Torque-rod.com Powered by ATRO

ATRO Polyurethane•Solutions sees Torque-rod.com as a solution," said Mark Sturmon, President & Owner of ATRO Engineered Systems. "We believe in saving our customers time, whether it's less downtime due to our exclusive ATRO POLYS or assisting our customers and distributors in finding the right part faster." The time-consuming task of cross-referencing charts or web-sites to find the right torque rod and bushings is over. ATRO's Torque Rod Finder tool makes VIN-less part identification easy and fast. Users simply select the rod configuration and input the center-to-center measurement. Whether straddle, tapered or hollow bushings, or torque rod lengths 14 to 26 inches, Torque-Rod.com will locate the necessary rod.
